

TYPICAL SECTION

N.T.S.

NOTES:

1. Pavement depth based on subgrade CBR of 7. If actual on site is less, either metal depth is to be thickened, geotextile used or subgrade strengthened.
2. Where grades are steeper than 1 in 8 kerb and channel or fully lined channels are required for stormwater control.
3. Private way entrances shall comply with maximum driveway profile as per SD 3.15.
