

Monthly Cycle Monitoring Report (April 2013)

- There has been a decrease of 2.2% in cyclist movements in April 2013 when compared to April 2012.
- In April this year there were 2 less weekend days/holidays than in April 2012. Since 30% of the count is attributed to the am and pm peaks during weekdays a sizeable proportion can be attributed to recreational/sport cycling in the weekend. The sites where decreases were recorded during this month were Tamaki Drive, Upper Harbour Drive, Twin Streams and the North-Western Cycleway (Te Atatu)
- The morning peak movements increased by 9.54% when compared to April last year.
- A total of 837,973 cycle trips were recorded for the year May 2012 to April 2013, this is an increase of 6.85% on the previous year.

Note: Automatic monitoring data from nine sites: Upper Harbour Drive, Great South Road, Highbrook, Lake Road, North-Western cycleway Kingsland and Te Atatu, Orewa Cycleway, Tamaki Drive (E/bound), Twin Streams path.

Monthly Comparisons of Cycle Movements

	Morning Peak Movements					Increase		
	2010	2011	2012	2013	2010 -11	2010 -12	2012-13	
January		6,905	9,491	10,345		37.5%	9.0%	
February		8,385	10,894	12,913		29.9%	18.5%	
March		9,662	10,526	13,066		8.9%	24.1%	
April		8,040	10,444	11,440		29.9%	9.54%	
May		9,315	10,856			16.5%		
June		7,998	8,037			0.5%		
July		6,100	6,977			14.4%		
August		8,557	9,319			8.9%		
September		8,005	9,211			15.1%		
October		7,185	9,884			37.6%		
November	7,962	9,272	12,343		16.5%	33.1%		
December	6,904	7,461	7,885		8.1%	5.7%		

	Total Movements					Increase		
	2010	2011	2012	2013	2010 -11	2011-12	2012-13	
January		64,836	83,629	86,768		29.0%	3.8%
