

Manukau Bus Station

December 2017

Auckland Transport is constructing a 23-bay bus station at Manukau right next to the existing train station.

Construction updates

We are up and running...well in part anyway.

In conjunction with the launch of the Eastern New Bus Network, scheduled services began operating from the Manukau Bus Station on Sunday 10 December. The southern side of the site was completed early with shelters, lighting, security cameras, and planting all finished in time for the new service to begin.

The bus station building will be mostly complete by the end of the year. After Christmas, new retail and restaurant/café will be created inside the building.

Streetscape works next to the Bus Station on Putney Way, Davies Ave and Osterley Way will continue until the end of January 2018 when this area will be open for public use while Putney Way is upgraded.

The very first bus leaves Manukau Bus Station on Sunday 10 December

The Putney Way upgrade begins at the end of January 2018

Putney Way is about to be transformed to a more attractive modern urban environment with an exciting, vibrant new transport hub adding to the mix of popular cafes and businesses already operational from April 2018.

We will be installing better, environmentally friendly drainage and then raise the road level to be flush with the pavement before resurfacing the road, and pavements.

The new drainage will incorporate a raingarden to treat water before it goes into the stormwater system. New furniture, lighting and planting will also be installed.

Putney Way will still remain open for business although the street itself will close at the end of January 2018 for two months for construction.

From all of us at Auckland Transport, we wish you the very best of the festive season.
