Stephen Town - CEO Auckland Council
Roger McDonald – CEO Panuku Development

Dear Stephen, Roger

RE: Wynyard Quarter South Road Upgrade

The Auckland Transport Board at their April meeting approved the Procurement Strategy, Procurement Plan and delegated the contract award to the AT CEO for the above roading project. Prior to approval, they asked for clarification on the level of future proofing of this project for the proposed Light Rail project. Our engineering team have advised that the level of future proofing is minimal and does not extend to any substructure of specific services relocation outside of what we require to upgrade the road and Linear Park.

We would expect that when any decision is made about Light Rail then the two project teams would work together to co-ordinate and ensure minimal duplication. Until then we will continue as planned with the proposed central physical work package commencing in June 2018.

Yours sincerely

Greg Edmonds
Chief Infrastructure Officer
