Welcome
Auckland Transport is creating streets for people, making it safe for those walking and traveling by bike to get around. As our cycling network grows, you can join the thousands of people taking to two wheels to explore and take regular everyday trips by bike.

Get ready to ride
Fifty-six thousand people started riding in Auckland last year - get on your bike and join them.

Cycle skills sessions
Auckland Transport wants to help you, your family and friends get riding. We provide training courses at no cost for adults and kids. Courses include Learn to Ride for kids and bike skills and maintenance for adults.

See share smile
When you’re riding on a shared path, take care for people walking or running. Keep to the left, ring your bell and slow down when you pass.

Quick tips
In New Zealand, you must wear a helmet and have a rear reflector on your bike. At night you need a white front light and a red rear light so others can see you easily. A bell lets people know when you are passing and a bike lock is a good idea too.

How to use this map
This map is one in a series of maps showing the Auckland Cycle Network. Expand your ride by joining up this map with others.

To the left are a few examples of neighboring maps.

Whether riding locally with kids or heading into the city for work or play you can use this map to choose the best path for you. It’s colour-coded to help you plan your ride and know what to expect.

Thicker lines are major cycleways.

Thinners lines are smaller local routes or connectors.

What is the difference between a shared path and a protected cycleway? Check out our mini design guide.

- Protected cycle lane
- Shared path
- Quiet routes
- On-road cycle lane
- Tu Ara White - Lightpath

How much for transport
- Protected cycle lanes are dedicated paths for people using bikes. They are physically separated from people driving and people walking, using various forms of separation including planted boxes, concrete kerbs, flex-posts, or berm space. Examples of these are Quay Street and Nelson Street.

- Shared paths are exactly that, paths shared by people walking and cycling. Tamaki Drive and Carlton Kfully Path are examples. Shared paths are also found within local reserves or can be specially marked footpaths. It is important to look out for others, slow down, and pass with care.

- Quiet routes are on-road cycle lanes, often painted with white surface greenery on part of the road that is dedicated for people using bikes. Examples of this is found on Carlton Gore Road.
