Parking in New Lynn

This guide provides information on current parking availability in and around central New Lynn.

New Lynn has undergone a significant transformation to become an attractive and modern metropolitan centre. Investment and redevelopment will continue as the centre evolves to cater for a significant population increase over the coming decades.

Managing parking effectively is vital to achieving the intensive and vibrant residential and commercial developments we want in New Lynn. As more people live within the centre, or walk, cycle or use public transport to access it, these activities must be supported with appropriate facilities. This means balancing the wider needs of the centre as a whole with the need for parking. Parking demand will also increase, and the parking asset needs to be managed in a way that supports the retail heart of New Lynn while still encouraging opportunities for redevelopment.

All day free parking is now provided on the edge of central New Lynn and the majority of parking in the central area is time restricted or paid parking.
