### ● Carpool parking

Priority parking is at the Albany Busway Station, Devonport ferry terminal and Birkenhead ferry terminal. They are available for vehicles with two or more people in them when parking. They have particular hours of operation. They are run by Auckland Transport.

### ■ Priority lanes

Priority lanes are on-ramp lanes heading towards the motorway, where vehicles with 2 or more people can bypass the ramp signal. Priority lanes can also be used by trucks, buses and motorcycles. The ramp signals are the lights that flash red and green on motorway on-ramps to manage the level of traffic entering the motorway. These operate when there is a level of congestion on the motorway that triggers them to turn on. The priority lanes are able to be used by carpoolers at any time. These lanes are run by NZTA.
