

Financial Results for the Six Months Ended 31 December 2011

This report should be read in conjunction with the financial report which can be found in the open section of the agenda papers.

Table of contents

- 1. Executive Summary Financial results overview (included in open agenda item)
- 2. Statement of Financial Performance
 - a. Split by category (section 1)
 - b. Split by activity (section 2)
- 3. Capital expenditure results
 - a. Overview of results (section 3)
 - b. Split by activity (section 4)
 - c. Variance explanation (section 4a)
 - d. Projects > \$1.5m (section 5)
- 4. Statement of Financial Position
 - a. Statement of financial position (section 6)
 - b. Notes to the financial statements (section 6a)
- 5. Accounts Receivable/Payable (section 7)

Section 1 - Statement of Financial Performance for the six months ended 31 December 2011 Split by category

Section 4a - Capital expenditure variance explanation

Capital expenditure for the month was \$56.9m, an underspend to forecast of \$1.5m. YTD capital expenditure was \$237.0m, a variance to forecast of \$30.2m.

The YTD variance is due to:

- \$29.9m underspends in Roads new capital expenditure. This is primarily due to:
 - \$18.2m AMETI-Land (wider project). The purchase of some of the larger properties will take longer than anticipated. Property purchases expected to occur in December 2011 have been deferred to April-June 2012.
 - \$5.1m NORSGA PC 15 Massey North. Construction is delayed due to wet weather conditions, however the project is still expected to be finished by the end of the financial year.
- \$9.7m underspends in various road renewal projects. This is mainly due to delay in the resurfacing and Area Wide Pavement Treatment (AWPT) of the South and Central areas. The delay is primarily due to wet weather conditions, however it is expected that the majority of the road renewal projects will be delivered by the end of the financial year.

This has been partly offset by:

- \$9.9m overspends in public transport new capital expenditure. This is primarily due to:
 - \$10.5m in EMU procurement project. This represents the amount paid to KiwiRail for their project costs. These costs were allowed for in the overall project budget but not included in the last forecast because the amount and timing of the payment was unknown.
 - \$1.5m in EMU depot project. Land development costs were paid in December 2011 but forecasted in January 2012. The good weather in November allowed the contractor to proceed at a faster pace than expected.
- Vested assets amounting to \$0.7m were received from Auckland Council in December 2011.

: Largely on track

Some issues or risksProject issues or risks

Confidence Rating Definition:

High - indicates that there is a high level of confidence that the project is on track based on the planned timeline. And the actual project cost will likely be in line with its full year forecast/budget by the end of the financial year. There are no major issues that will unfavourably impact the completion of the project. Low – indicates that there is a low level of confidence that the project will be accomplished based on the planned timeline. And/ or the actual project cost will likely be way over/ under its full year forecast/budget by the end of the financial year. There are major issues that will unfavourably impact the completion of the project on time. (e.g. difficulties with land acauisition. desian difficulties. consent issues.etc.).

Medium – indicates that there is a medium level of confidence that the project is on track based on the planned timeline. And/ or the actual project cost will likely be slightly over its full year forecast/budget by the end of the financial year. There are no major issues that will unfavourably impact the completion of the project.

Section 6a - Notes to the Financial Statements As at 31 December 2011

	As at 31 December 2011	Actual	Actual
		31 Dec 2011	30 Nov 2011
		\$000	\$000
1	Cash and cash equivalents		
	Cash at bank	5,230	2,820
	Till floats	139	140
	Total cash and cash equivalents	5,369	2,960

The carrying value of cash and cash equivalents approximates their fair value.

2 Trade and other receivables

(95)	(95)
148,876	190,956
19,096	5,298
47,076	48,001
71,446	115,360
8,452	8,768
2,806	13,529
_	8,452 71,446 47,076 19,096

The carrying value of debtors and other receivables approximates their fair value.

There is no concentration of credit risk with respect to receivables as there are a large number of customers.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above.

The ageing profile of receivables at 31 December 2011 is detailed below:

	Gross \$000	Impaired \$000	Net \$000
Not past due	140,140	-	140,140
Past due 1 - 30 days	-	: - :	1-
Past due 31 - 60 days	3,704	-	3,704
Past due 61 - 90 days	838	-	838
Past due > 90 days	4,194	(95)	4,099
	148,876	(95)	148,781

All receivables greater than 30 days in age are considered to be past due.

The provision for impairment of receivables has been calculated on an individual basis. The provision is based on a review of significant debtor balances. Receivables are assessed as impaired due to significant financial difficulties being experienced by the debtor, and Auckland Transport management concluding that it is remote that the overdue amounts will be recovered.

Movements in the provision for impairment of receivables are as follows:	Actual
	\$000
At 30 June 2011	95
Additional provisions made	
Provisions reversed	e ·
Receivables written-off	-
At 31 December 2011	95

Actual

Actual

Fair value

Interest rate swaps

The fair values of interest rate swaps have been determined by calculating the expected cash flows under the terms of the swaps and discounting these values to present value. The inputs into the valuation model are from independently sourced market parameters such as interest rate yield curves. Most market parameters are implied from instrument prices.

Forward foreign exchange contracts

The fair values of forward foreign exchange contracts have been determined by using a discounted cash flows valuation technique based on quoted market prices. The inputs into the valuation model are from independently sourced market parameters such as currency rates. Most market parameters are implied from instrument prices.

Interest rate swaps

The notional principal amount of the outstanding interest rate swap contracts was \$505m at 31 December 2011, and their fixed interest rates varied from 4.72% to 5.41%.

The loss of \$23.2m relating to the ineffective interest rate swaps has been recorded in the Statement of Financial Performance.

Forward foreign exchange contracts

The notional principal amount of outstanding forward foreign exchange contract cash flow hedges at 31 December 2011 was NZD\$397.318m. These cash flow hedges have been accounted for as effective and the loss of \$6.9m on the their revaluation has been transferred to the cash flow hedge reserve within equity.

At 31 December 2011 the notional principal amount of outstanding forward foreign exchange contract that are not hedge accounted was NZD\$14.118m. The loss on their revaluation of \$2.97m has been recorded in the Statement of Financial Performance.

Section 7 - Accounts Receivable and Accounts Payable Monthly Report.

Accounts Receivable

An overview of the Debtors as at 17 January with 92.8% of outstanding Debtors in 30 and 60 days.

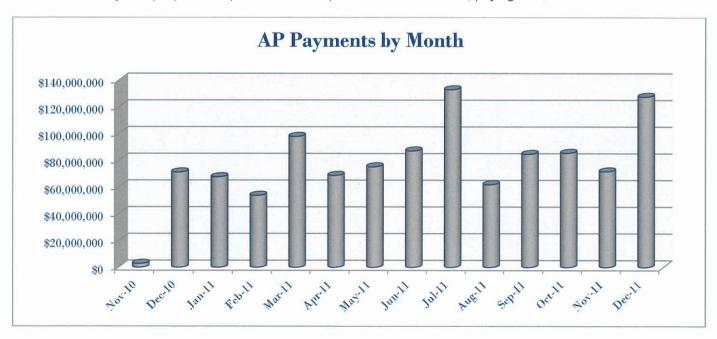

Debtors Ageing Analysis as at 17 January 2012

Description	Ave Days	Total O/s	30 Days	60 Days	90 Days	120 Days	120+ Days N	lotes
Debtors Ageing 17 Jan	58	3,268,975 100.0%	969,837 29.7%	1,937,126 59.3%	185,617 5.7%	92,584 2.8%	83,811 2.6%	
O/s AC and CCO's	62	706,547	140,542	439,644	96,496	11,774	18,092	1
O/s Queries to Business	94	11,273	-920	-232	2,356	1,082	8,986	2
Disputed Invoices	286	9,428	0	0	0	0	9,428	3
Debtors paid to AC	109	32,581	0	0	467	3,573	28,541	4
Adjusted Debtors	<u>N/a</u>	2,509,146 100.0%	830,215 33.1%	1,497,714 59.7%	86,298 3.4%	76,155 3.0%	18,764 0.7%	

- 1 Of the amounts outstanding from Auckland Council and CCO's, 82.2% are less than 60 days old.
- 2 A number of invoices have been returned to the business where the Debtors have queried charges. We have been able to resolve many of these queries through interaction with the departments.
- 3 We have very few disputed invoices in the system at present, with the largest dispute being an amount of \$7.668 owing by Tournament Parking. The matter has been referred to the Parking Group.
- 4 These relate to a few Parking lease and other Debtors who have paid their outstanding amounts across to Auckland Council in error. We are working closely with AC to facilitate transfer of these monies across.

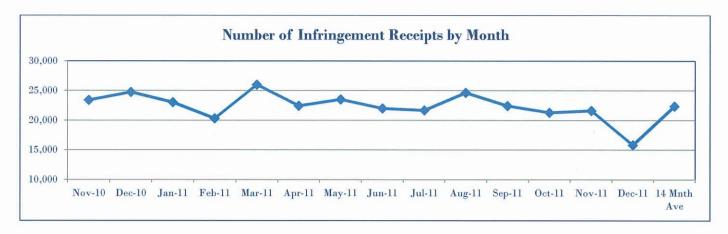

Accounts Payable

The Accounts Payable (AP) team experienced a bumper month in December, paying out \$ 127m.

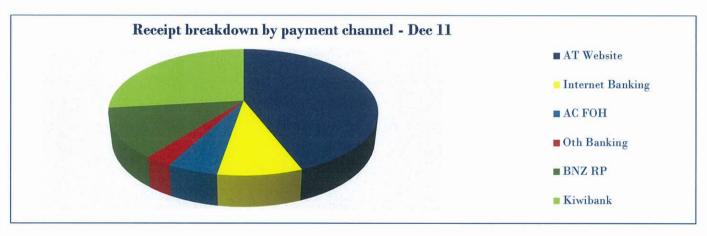

Infringements

The number of receipts processed during December was well down on any of the previous 13 months, coming in at 71% of the 14 month average. The same percentage was applicable on receipts by value. This is a direct result of the close down between Christmas and the New Year and receipts during this period will reflect in January results.

Members of the public continue to make use of the AT Website and Kiwibank to pay infringements and currently those two options account for 71% of receipts. The BNZ over the counter payment channels for and cheques posted to AT account for 13% of all payments while Internet Banking accounts for 9%. AC service centres only make up 5% of receipts but their average receipt size is almost double that of any of the other channels.

The following table is an overview of Infringements issued, paid and lodged with the Ministry of Justice between 1 November 2010 and 31 October 2011. As expected, almost 70% of the lower value PINS infringements are paid within 63 days compared with only 20% of TINS and 56% of BusBike infringements.

	OVERVIEW	OF INFRIN	GEMENTS	S ISSUED,	PAID and I	ODGE	D WITH MO	J - 1 NOV	EMBE	R 10 to 31 OC	TOBER 11

	Infringements	<u>Infringement</u>	Issued PA	Value PA	<u>Volume</u>		<u>Paid</u>	Lodged MOJ		Lodged MOJ	Lodgement	Lodgement
		-		'000			'000			'000		'000
PINS	\$12 to \$60	\$30.98	257,290	\$7,970	175,209	68.1%	\$5,427	82,081	31.9%	\$2,543	\$26.67	\$2,189
TINS	\$200+	\$201.94	101,548	\$20,507	19,909	19.6%	\$4,021	81,639	80.4%	\$16,486	\$26.67	\$2,177
Bus/Bike	\$150	\$150.07	20,626	\$3,095	11,462	55.6%	\$1,720	9,164	44.4%	\$1,375	\$26.67	\$245
Totals		\$83.20	379,464	\$31,572	206,580	35.4%	<u>\$11,168</u>	172,884	64.6%	\$20,404	\$26.67	<u>\$4,611</u>

In our first 12 months of lodgement with MOJ, they have collected 86% of PINS, 35% of TINS and 60% of Busbike infringements. In addition to this, they also have a substantial amount of collections currently under a payment arrangement which is not reflected in these collection percentages.

Recommendation

(i) That the report be received.

Glossary

(AC)
(AT)
(EMU)
(FRC)
(FX)
(FAR)
(KRG)
(NZTA)

Executive Summary

This report updates the Board on progress with the financial reports and forecast. It also covers a request from AC that AT meets the costs of the KiwiRail FX losses paid by AC as part of the EMU funding agreement with the Crown.

Recommendation

It is recommended that the Board:

- i) Agrees to meet the costs of the KiwiRail FX losses paid by Auckland Council
- ii) Notes that the Crown Grant of up to \$90m will be paid to AT as a Grant.

Forecast

The Forecast includes a reduction to the NZTA subsidy to reflect a lower subsidy due to the FAR variance model adopted by the Board. With the over-programming methodology adopted by AT for the first time in 2012, the FAR variance model and some uncertainty at the time the original estimates were completed, we have a range of changes which are impacting on the level of expected funding from NZTA. We have identified some risk that the subsidy from NZTA will be significantly lower than expected. We are getting on top of the issue and now have significant clarity on the cause of the changes. We have had preliminary discussion with NZTA and we are meeting with them to identify the issues and discuss potential solutions. The CFO will update the meeting on the implications for the forecasts and any potential remediation AT will need to put in place.

There are a number of minor issues in the forecast but the major change is the expected \$6m reduction to the Parking revenue.

Please refer Section 7 and 7a of the January 2012 Financial Results section for the full quarter two forecast details. This forecast has not been incorporated into the January report as we do not roll forecast information into the Statements until it has been accepted by the Board.

Report Development

Finance have added a sample activity statement to the report, and would welcome any feedback on the formats. Staff are currently working to ensure that the alternate "view" of the organisation reconciles to other financial information. We are also working on a report that reflects the organisational structure view of the financial information. We have removed the statement of cash flows due to the reconciliation difficulties with the capital spend. With a significant portion of AT spend being on capital the breakdown of our payables into operations and capital needs to be built into the report as a note. The report will be included in the February month end report.

KiwiRail Foreign Exchange Losses

AC have written to AT to request that AT meet the costs of the KRG FX loss which was included in the Agreement for EMU's. The level of the loss is \$42m and for it to be paid by AT will require a Board resolution. The matter was discussed by the FRC due to the potential impact on the 6 month financial information for the Auckland Council Group half year report.

AC's view is that it is a cost of the EMU agreement and should reflect in AT statements for the purposes of transparency. This then raises the issue of which organisation will get the Government Grant which was also part of the agreement. It was anticipated originally that the loss would be paid from the Government Grant, and the net funding then applied to the capital costs of the project. When the agreement was completed the Grant was not included into cashflows until 2014/15, creating a gap between payment of the loss and receiving the revenue. The FRC indicated that the principle adopted should be that the KRG FX costs be met by the organisation that receives the Grant. The view also was that the Grant should be paid to AT and therefore the KRG FX should be paid by AT.

We have been working with AC to ensure that there is adequate documentation in place to ensure that the Grant will be paid to AT. The agreement is silent on whether the Crown will pay it to AC or AT. The CFO and the FRC Chair are seeking confirmation from AC that any Grant paid to AC will be paid to AT as a Grant. The current letter from AC states that the net benefit of the Grant will go to the benefit of AT, but does not state that it will be paid as a Grant. This potentially means that the Grant will be retained by AC and used to repay loans raised by the AC to fund the acquisition of EMU's. While this is also what AT would do with the funds it does mean that AT would have the cost of the loss but not the revenue as a Grant.

AC has been asked to provide assurance that the Grant will be paid to AT, and the Board will be updated on progress at the Board meeting.

The expense will impact on the Profit and Loss Statement and will increase the loss by \$42m. The actual funding will come from a loan and will be repaid when the Grant is received. It does not impact on the costs of the project simply on where costs are met within the total funding package. Our analysis and modelling to date has included the cost but has offset it directly against the Grant, so the cost does not impact on our net expected position for the EMU and depot, which was a debt of \$544m.

Section 4a - Capital expenditure variance explanation

Capital expenditure for the month was \$32.5m, an underspend to forecast of \$28.3m. YTD capital expenditure was \$270.0m, a variance to forecast of \$58.0m.

The YTD variance is mainly due to:

- \$29.9m underspends in Roads new capital expenditure. This is primarily due to:
 - \$19.0m AMETI-Land (wider project). The purchase of some of the larger properties will take longer than anticipated. Property purchases expected to occur in December 2011 have been deferred to April-June 2012. A number of land purchase agreements are currently being finalised.
 - \$5.0m NORSGA PC 15 Massey North. Construction activities were delayed by the developer and are progressing slower than originally anticipated. Extended periods of wet weather have also caused construction delays. It should be noted that the Line deviation component of the project has been removed from AT's budget and this will now be paid for by Auckland Council.
 - \$3.6m MCC pavement reconstruction project. The project has been delayed but is expected to be completed by the end of the financial year.
 - \$1.5m Albany Highway upgrade. This is mainly due to major property acquisition significantly behind forecast.
- \$9.8m underspends in various road renewal projects. This is mainly due to a delay in the resurfacing and Area Wide Pavement Treatment (AWPT) of the South and Central areas. The delay is primarily due to wet weather conditions, however it is expected that the majority of the road renewal projects will be delivered by the end of the financial year.
- \$13.1m underspend in the EMU project. This is mainly due to the deferral of the project milestone payment in January 2012 due to the contractor (CAF) not achieving the required project milestone (design specification).

Results Achieved:

Largely on track: Some issues or risks: Project issues or risks

Confidence Rating Definition:

High - indicates that there is a high level of confidence that the project is on track based on the planned timeline. And the actual project cost will likely be in line with its full year forecast/ plan by the end of the financial year. There are no major issues that will unfavourably impact the completion of the project. Low – indicates that there is a low level of confidence that the project will be accomplished based on the planned timeline. And/ or the actual project cost will likely be way over/ under its full year forecast/ plan by the end of the financial year. There are major issues that will unfavourably impact the completion of the project on time. (e.g. difficulties with land acquisition. design difficulties. consent issues.etc.).

Medium - indicates that there is a medium level of confidence that the project is on track based on the planned timeline. And/ or the actual project cost will likely be slightly over its full year forecast/ plan by the end of the financial year. There are no major issues that will unfavourably impact the completion of the project.

Section 6a - Notes to the Financial Statements As at 31 January 2012

	\$000	\$000
Cash and cash equivalents		
Cash at bank	7,459	5,230
Till floats	139	139
Total cash and cash equivalents	7,598	5,369

Actual

31 Jan 2012

Actual

31 Dec 2011

The carrying value of cash and cash equivalents approximates their fair value.

2 Trade and other receivables

145,858	148,781
(95)	(95)
145,953	148,876
11,216	19,096
25,351	47,076
98,492	71,446
8,288	8,452
2,606	2,806
	2.606

The carrying value of debtors and other receivables approximates their fair value.

There is no concentration of credit risk with respect to receivables as there are a large number of customers.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above.

The ageing profile of receivables at 31 January 2012 is detailed below:

	Gross \$000	Impaired \$000	Net \$000
Not past due	134,055	-	134,055
Past due 1 - 30 days	-		-
Past due 31 - 60 days	1,696	-	1,696
Past due 61 - 90 days	1,814	-	1,814
Past due > 90 days	8,388	(95)	8,293
	145,953	(95)	145,858

All receivables greater than 30 days in age are considered to be past due.

The provision for impairment of receivables has been calculated on an individual basis. The provision is based on a review of significant debtor balances. Receivables are assessed as impaired due to significant financial difficulties being experienced by the debtor, and Auckland Transport management concluding that it is remote that the overdue amounts will be recovered.

Movements in the provision for impairment of receivables are as follows:

	Actual
	\$000
At 30 June 2011	95
Additional provisions made	-
Provisions reversed	-
Receivables written-off	
At 31 January 2012	95

	Actual	Actual
	31 Jan 2012	31 Dec 2011
	\$000	\$000
Trade and other payables		
Creditors	39,382	74,830
Accrued expenses	78,061	57,024
Amounts due to related parties	3,860	12,095
	121,303	143,949
	Creditors Accrued expenses	Trade and other payables Creditors Accrued expenses Amounts due to related parties \$000 39,382 78,061 3,860

Creditors and other payables are non-interest bearing and are normally settled on 20-day terms. Therefore, the carrying value of creditors and other payables approximates their fair value.

4 Employee benefit liabilities

	8,050	7.967
Long service leave	548	548
Retirement gratuities	387	387
Non-current portion		
Accrued leave	5,095	5,608
Accrued salaries and wages	2,020	1,424
Current portion		

5 Derivative financial instruments

Current liability portion		
Forward foreign exchange contracts - cash flow hedges	4,656	806
Forward foreign exchange contracts - not hedge accounted	3,076	2,973
Total current liability portion	7,732	3,779
Non-current liability portion		
Interest rate swaps - cash flow hedges	20,579	23,231
Forward foreign exchange contracts - cash flow hedges	23,559	6,046
Total non-current liability portion	44,138	29,277
Total derivative financial instrument liabilities	51,870	33,056

Fair value

Interest rate swaps

The fair values of interest rate swaps have been determined by calculating the expected cash flows under the terms of the swaps and discounting these values to present value. The inputs into the valuation model are from independently sourced market parameters such as interest rate yield curves. Most market parameters are implied from instrument prices.

Forward foreign exchange contracts

The fair values of forward foreign exchange contracts have been determined by using a discounted cash flows valuation technique based on quoted market prices. The inputs into the valuation model are from independently sourced market parameters such as currency rates. Most market parameters are implied from instrument prices.

Interest rate swaps

The notional principal amount of the outstanding interest rate swap contracts was \$505m at 31 January 2012, and their fixed interest rates varied from 4.75% to 5.41%. These interest rate swaps have been accounted for as effective and the loss of \$20.58m on the their revaluation has been transferred to the cash flow hedge reserve within equity.

Forward foreign exchange contracts

The notional principal amount of outstanding forward foreign exchange contract cash flow hedges at 31 January 2012 was NZD\$397.398m. These cash flow hedges have been accounted for as effective and the loss of \$28.2m on the their revaluation has been transferred to the cash flow hedge reserve within equity.

At 31 January 2012 the notional principal amount of outstanding forward foreign exchange contract that are not hedge accounted was NZD\$11.598m. The loss on their revaluation of \$3.076m has been recorded in the Statement of Financial Performance.

(69.8)	(10.0)	(17.1)	(15.7)	(71.4)	(55.7)	Û	

586.3

576.6

(9.7)

270.0

The changes for the quarter two forecast review are as follows:

Operating income is forecast down by \$4.6m due to reduced parking revenue of \$6.1m offset by minor net revenue increases \$1.5m.

546.2

328.0

Expenditure is forecast to increase by \$1.7m.

Income for capital projects is forecast down by \$49.4m due to reduced NZTA renewal funding of \$50.0m partly offset by increased vested asset income of \$0.6m. The reduction in NZTA subsidy reflects a lower subsidy due to the FAR variance model adopted by the Board. With the overprogramming methodology adopted by AT for the first time in 2012, the FAR variance model and some uncertainty at the time the original estimates were completed, we have a range of changes which are impacting on the level of expected funding from NZTA. We have identified some risk that the subsidy from NZTA will be significantly lower than expected. We are getting on top of the issue and now have significant clarity on the cause of the changes. We have had preliminary discussion with NZTA and are meeting with them to identify the issues and discuss potential solutions. The CFO will update the meeting on the implications for the forecasts and any potential remediation AT will need to put in place.

<u>Capital expenditure</u> is forecast down by \$9.7m with a total forecast programme for the year to June 2012 of \$576.6m.

Section 8 - Accounts Receivable and Accounts Payable Monthly Report.

Accounts Receivable

An overview of the Debtors as at 31 January with 96.2% of outstanding Debtors in 30 and 60 days.

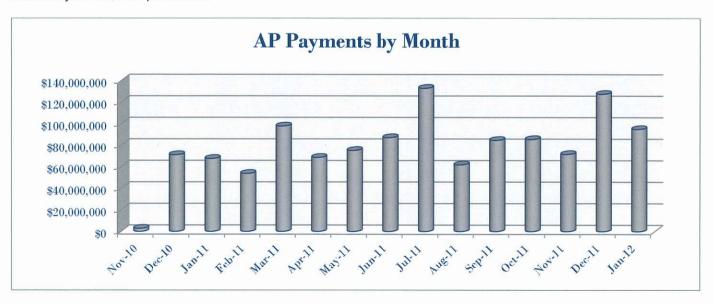

Debtors Ageing Analysis as at 31 January 2012

Description	Ave Days	Total O/s	30 Days	60 Days	90 Days	120 Days	120+ Days	Notes
Debtors Ageing 31 Jan	63	3,632,336 100.0%	1,943,038 53.5%	300,455 8.3%	1,135,520 31.3%	138,723 3.8%	114,600 3.2%	
O/s AC and CCO's	62	1,047,429	593,740	235,831	92,397	97,008	28,453	1
O/s Queries to Business	94	11,582	-690	-454	2,837	328	9,561	2
Disputed Invoices	286	734,157	3,862	-326,167	992,093	10,087	54,283	3
Debtors paid to AC	109	33,833	0	0	205	-231	33,859	4
Adjusted Debtors	<u>N/a</u>	1,805,336 100.0%	1,346,126 74.6%	391,246 21.7%	47,989 2.7%	31,532 1.7%	<u>-11,557</u> -0.6%	

- We are currently working with AC in an effort to introduce a new process to speed up payment. The amounts older than 60 days relate to Parking across various sites.
- 2 A number of invoices have been returned to the business where the Debtors have queried charges. We have been able to resolve many of these queries through interaction with the departments.
- We are currently experiencing 2 large disputes where the business are endeavouring to sort out disputes with Fletchers Construction (Road Corridor Access) and Vodafone NZ (AT Property for Cell Towers). Vodafone have \$673k o/s in 90 days with a credit of \$326k in 60 days. We have now made contact with the Managers of both Departments in an effort to resolve the matters quickly.
- 4 The \$33k in 120+ days relates to an amount paid by Vodafone to the former Waitakere Legacy Council. We have had confirmation that the amount will be transferred to AT on 10 February.

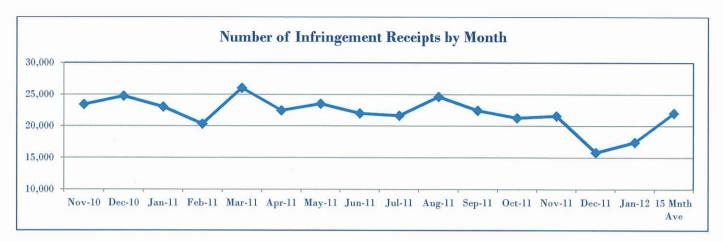

Accounts Payable

The Accounts Payable (AP) team paid out \$95m in January, which is on par with the 7 month average for the current financial year of \$94m per month.

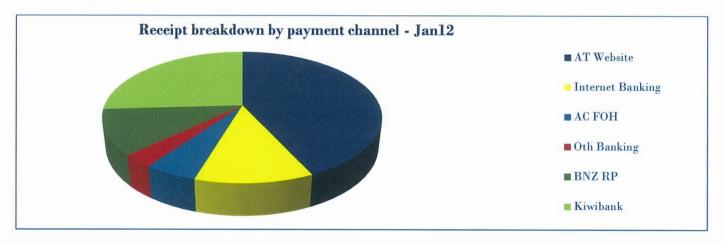

Infringements

The number of receipts processed during January is once again well down on any of the previous 13 months, as was the case in December. The trends displayed in December 2010 and January 2011 showed very little difference to the months before and after. Having looked back over legacy ACC statistics, infringement receipts over these 2 months were always well down on the rest of the year. We would expect this to normalize in February.

While the shape of the chart has not changed much this month, we can report that internet banking has grown substantially in January. This could be as a result of people being on leave and using the easiest method of getting an infringement paid. As mentioned previously, this is our payment method of choice as there is no cost attached to payments via this channel. The AT website and Kiwibank remain the most popular payment methods with a combined 69% of receipts.

Ministry of Justice

We have recently received confirmation from Auckland Council, that they have agreed to the Transport proposal where AT receives all payments in respect of the former Legacy Councils. This change comes into effect from 1 February and will help ensure that Transport receives the electronic court fines and payment in a timely manner from MOJ. Monies not for Transport will be disbursed back to the former Legacy Councils. MOJ are currently providing the reports which have been mislaid by the Legacy Councils.

Transport have recently set up a SQL database which will be used to track all lodgements with and recoveries from MOJ. We are currently in the process of combining electronic files / payments from MOJ and plan to provide a comprehensive analysis of all activity with MOJ in the February report.
